Discovering Maximal Frequent patterns in Big Data Using MaxFPGrowth Algorithm

In this tutorial, we will discuss two approaches to find Maximal Frequent patterns in big data using MaxFPGrowth algorithm.

- 1. **Basic approach:** Here, we present the steps to discover Maximal Frequent patterns using a single minimum support value
- 2. **Advanced approach:** Here, we generalize the basic approach by presenting the steps to discover Maximal Frequent patterns using multiple minimum support values.

Basic approach: Executing MaxFPGrowth on a single dataset at a particular minimum support value

Step 1: Import the MaxFPGrowth algorithm

```
In [1]: from PAMI.frequentPattern.maximal import MaxFPGrowth as alg
```

Step 2: Specify the following input parameters

```
In [2]: inputFile = 'transactional_T10I4D100K.csv'
minimumSupportCount=100 #Users can also specify this constraint between 0 to 1.
seperator='\text{\text{\text{\text{$Y$}}}'}
```

Step 3: Execute the MaxFPGrowth algorithm

```
In [3]: obj = alg. MaxFPGrowth(iFile=inputFile, minSup=minimumSupportCount, sep=seperator)
  obj. startMine() #Start the mining process
```

Maximal Frequent patterns were generated successfully using MaxFp-Growth algorithm

Step 4: Storing the generated patterns

Step 4.1: Storing the generated patterns in a file

```
In [4]: obj. savePatterns(outFile='frequentPatternsMinSupCount100.txt')
```

Step 4.2. Storing the generated patterns in a data frame

```
In [5]: frequentPatternsDF= obj. getPatternsAsDataFrame()
```

Step 5: Getting the statistics

Step 5.1: Total number of discovered patterns

2022/08/22 12:15 MaxFPGrowth-st

```
In [6]: print('Total No of patterns: ' + str(len(frequentPatternsDF)))
    Total No of patterns: 4054

Step 5.2: Runtime consumed by the mining algorithm

In [7]: print('Runtime: ' + str(obj. getRuntime()))
    Runtime: 7. 524362564086914

In [8]: ##### Step 5. 3: Total Memory consumed by the mining algorithm

In [9]: print('Memory (RSS): ' + str(obj. getMemoryRSS()))
    print('Memory (USS): ' + str(obj. getMemoryUSS()))
    Memory (RSS): 502620160
    Memory (USS): 464343040
```
